

National Highways Authority of India

**(Ministry of Road, Transport & Highways)
Government of India**

**Six laning of Kagal-Satara section of NH-48 (old NH-4)
[Package – II from km 658.000 to km 725.000] in the
State of Maharashtra to be executed on BOT (Toll) mode
under Bharatmala Pariyojana**

TECHNICAL SCHEDULE – A, B, C & D

G-5 & 6, Sector – 10, Dwarka, New Delhi – 110 075

SCHEDULE – A

SCHEDULE – A
(See Clause 10.1)

SITE OF THE PROJECT

1 The Site

- 1.1 Site of the Six-Lane Project Highway shall include the land, buildings, structures and road works as described in Annex -I of this Schedule-A.
- 1.2 An inventory of the Site including the land, buildings, structures, road works, trees and any other immovable property on, or attached to, the Site shall be prepared jointly by the Authority Representative and the Concessionaire, and such inventory shall form part of the memorandum referred to in clause 10.3.1 of the Agreement.
- 1.3 Additional land required for Toll Plazas, Traffic Aid Posts, Medical Aid Posts and vehicle rescue posts or for construction of works specified in Change of Scope Order issued under Clause 16.2.3 of this agreement shall be acquired in accordance with the provisions of Clause 10.3.6 of this Agreement. Upon acquisition, such land shall form part of the Site and vest in the Authority.

Annexure - 1
(Schedule - A)

1 Site

The Site of the Six-Lane Project Highway comprises the section of National Highway 4 commencing from Km 658.000 to Km 725.000 i.e. the Pethnaka – Satara section, passing through the Sangli and Satara district in the State of Maharashtra.

The Index map depicting the project road is also enclosed. The existing road is four lane divided carriageway with paved shoulder and mix of flexible and rigid pavements along its length.

The land use pattern of project corridor is principally Urban/Commercial, Industrial, rural, agricultural and linear plantation. The alignment traverses through plain to rolling terrain.

The land, carriageway and structures comprising the Site are described below.

Index Map

PROJECT ROAD SATARA - KAGAL (PACKAGE-2)

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

2 Land

The Site of the Project Highway comprises the land described below:

S. No.	Chainage (km)		Construction Zone within ROW (In m)	Total ROW (In m)	Date of Handover of Construction Zone	Date of Handover of Balance ROW

22 Existing Toll Plazas

- Near km. 694.150 – TASWADE Toll Plaza with 8 number of toll lanes (4 lanes in each direction)

23 Permanent Bridge, Tunnel or Flyover having length more than 60 meters

The Site includes the following permanent bridge/ tunnel / flyover with length as noted below:

- (a) Bridge – 2
- (b) Tunnel – NIL
- (c) Flyover – 1

24 Bypass costing Rs. 10 Crore or more

The Site includes the following bypass which was constructed at the cost noted below:

- (a) Bypass – NIL

25 Existing Utilities**(a) Electrical Utilities**

The site includes following electrical utilities

SCHEDULE – B

SCHEDULE – B**(See clause 2.1)****DEVELOPMENT OF THE PROJECT HIGHWAY****1** Development of the Project Highway

Development of the Project Highway shall include construction of the Project Highway as described in this Schedule-B and in Schedule-C.

2 Six-Laning

2.1 Six-Laning shall include the Project Highway as described in Annex-I of this Schedule-B and Annex-I of Schedule-C.

2.2 Six-Laning shall be completed by the Concessionaire in conformity with the Specifications and Standards set forth in Annex-I of Schedule-D.

**Annexure - 1
(Schedule –B)**

DESCRIPTION OF SIX-LANING

The project road starts from near Pethnaka at km 658.000 of NH 4 and ends at km 725.000. The road passes through the Sangli and Satara district of Maharashtra state. The existing road is four lane divided carriageway with paved shoulder and mix of flexible and rigid pavements along its length.

1. Width of Carriageway

1.1 The paved carriageway shall be 27.00m wide excluding the median which shall remain unchanged.

Provided that in the following urban stretches, the width of carriageway shall be:

S. No.	Chainage (km)		Name of Village/Town
	From	To	
1	659.800	660.600	Nerale
2	665.000	666.200	Kasegaon
3	671.000	672.200	Kasegaon
4	678.500	682.200	Karad
5	684.400	685.100	Gote
6	685.600	686.800	Kodeche
7	698.100	699.700	Umbraj
8	701.000	701.500	Korti
9	707.000	707.300	Kashil
10	707.600	708.400	Ichasnal
11	709.800	710.200	Ramkrishna Nagar
12	713.000	714.000	Atit
13	717.500	718.300	Murud
14	719.300	719.800	Borgaon
15	722.200	722.600	Bhart Gaon

1.2 Except as otherwise provided in this Agreement, the width of the paved carriageway shall conform to Clause 1.1 of Annex-I of Schedule-B above.

2. Project Facilities

Project facilities shall be constructed in conformity with Annex-I of Schedule-C.

3. Specifications and Standards

The Project Highway shall be constructed in conformity with the Specifications and Standards specified in Annex-I of Schedule-D.

4. Other Features of Six laning

4.1 Typical Cross Sections

The project highway shall be widened to six lane divided carriageway standard with paved shoulder and with or without service roads.

The typical cross-sections of six lane highway are as indicated in **Appendix B-I**.

Additional earth retaining structures shall have to be provided where necessary at the locations of space constraint in order to accommodate 2H: 1V side slopes.

4.2 Drawings

The strip plan, Plan & Profile of Flood affected stretch and Drainage Plan of Flood affected stretch for the project road are enclosed at **Appendix B-II**.

4.3 Bypasses & Realignment/Raising

Bypasses and realignment/raising are proposed as indicated in **Appendix B-III**.

4.4 Service Roads

Service Roads shall be provided in lengths as indicated in **Appendix B-IV**

4.5 At Grade Intersections/ Junctions

At grade intersections shall be provided at the junctions of service roads and all intersecting roads at locations specified in **Appendix B-V** for Major intersections and **Appendix B-VI** for Minor Intersections and these At Grade Intersections shall be developed as per the Manual.

4.6 Grade Separated Structures/ Flyovers

The Grade Separated Structures/ flyovers shall be provided as given at **Appendix B-VII**

4.7 Underpasses

The details of vehicular underpasses are given at **Appendix B-VIII**.
The details of light vehicular underpasses are given at **Appendix B- IX**.

4.8 Major Bridges

The details of Major bridges as indicated in **Appendix B-X**

4.9 Minor Bridges

The details of Minor bridges as indicated in **Appendix B-XI**.

4.10 Culverts

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

The details of Culverts as indicated in **Appendix B-XII**.

Rehabilitation of existing structures

The details of rehabilitation of existing structures as indicated in **Appendix B-XIII**.

4.11 Pavement

1. The existing paved shoulder shall be retained and further widening shall be carried out if the adjacent pavement and the paved shoulder are of same type and the existing paved shoulder shall be removed if the pavement is different from the adjacent carriageway type.

2. Pavement Design

Flexible Pavement design shall be carried out as per Manual / traffic requirements subject to a minimum design traffic of 120 MSA and minimum pavement composition as below:

BC - 50 mm
DBM -140 mm
WMM - 250 mm
GSB - 200 mm

Rigid Pavement design shall be carried out as per Manual / traffic requirement subject to minimum pavement composition as below:

PQC - 320 mm
DLC -150 mm
GSB – 150mm + 75mm (Matching Layer)

3. The design of new pavement shall take into account of matching with existing drainage layer for efficient drainage
4. The existing rigid pavement and proposed new rigid pavement portion shall be tied.
5. All pavement design and strengthening requirements shall be carried out as per Schedule D.
6. All distressed concrete panels/slabs in rigid pavement shall be identified jointly with I.E. and suitably repaired/replaced where required.
7. Detailed structural evaluation of pavements should be carried out using the Falling Weight Deflectometer (FWD) test (IRC117:2015) to assess the residual life of the pavement and its load transfer efficiency (LTE) and based on the analysis, final treatment (relaying/strengthening) may be adopted by the Concessionaire in consultation with IE/NHAI.

4.12 Retaining Wall / RE Wall

Detailed inspection of site are envisaged to determine the exact requirements of RE Wall, Retaining Wall and Toe Wall in the project site. The RE Wall, Retaining Wall and Toe Wall shall be provided as per TCS Schedule at Clause 4.1 of Annex-I of Schedule-B and site requirement and as per the Manual in consultation with Independent Engineer/Authority.

4.12 (a) RE Wall

The tentative locations of RE Walls are given below:

S. No.	Chainage (km)		Length (km)
	From (km)	To (km)	
1	660.200	660.900	0.700
2	661.525	662.075	0.550
3	663.940	664.760	0.820
4	667.940	668.540	0.600
5	671.860	672.850	0.990
6	677.830	678.500	0.670
7	678.660	678.700	0.040
8	678.700	678.820	0.120
9	682.300	682.560	0.260
10	692.584	693.700	1.116
11	697.000	697.470	0.470
12	697.470**	698.200**	0.730
13	703.900**	704.500**	0.600
14	710.460	711.640	1.180
15	713.000	713.800	0.800
16	714.850	715.550	0.700

Note:

1. Location and length of RE Wall provided above is as per TCS Schedule is tentative and minimum requirement. The actual length of RE Wall shall be determined by the Concessionaire in accordance with the Manual requirements with approval from the Independent Engineer/Authority. Any increase in the length specified in this Clause 4.12(a) of Annex-I of Schedule-B shall not constitute a Change of Scope, save and except any variations in the length arising out of a Change of Scope expressly undertaken in accordance with the provisions of Article 16.

2. **At these locations the new VUP including approaches and Service Roads are under construction by NHAI as separate Contract. The same shall be part of this Concession Agreement. Although no improvements is envisaged at these locations, improvements, if any, based on the actual site conditions as per Manual / Specifications and Standards is within the scope of the Concessionaire. Actual chainage may differ based on site condition.

4.12 (b) Retaining Wall

The existing partial Retaining Wall to be raised to accommodate the proposed cross section as per TCS Schedule at Clause 4.1 of Annex-I of Schedule-B. In case the proposed Cross Section as per TCS Schedule at Clause 4.1 of Annex-I of Schedule-B is not accommodated, new Retaining Wall to be constructed as per site condition and in consultation with Independent Engineer/Authority. The tentative locations of Retaining Walls are given below:

S. No.	Chainage		Length (km)
	From (km)	To (km)	
1	659.900	660.200	0.300
2	665.400	665.600	0.200
3	665.600	665.870	0.270
4	665.870	666.000	0.130
5	669.200	669.800	0.600
6	670.630	670.700	0.070
7	670.700	671.340	0.640
8	671.340	671.860	0.520
9	672.850	673.350	0.500
10	674.150	674.650	0.500
11	676.025	676.625	0.600
12	677.390	677.640	0.250
13	684.465	685.340	0.875
14	685.340	685.460	0.120
15	686.480	687.080	0.600
16	687.863	688.363	0.500
17	689.275	689.875	0.600

S. No.	Chainage		Length (km)
	From (km)	To (km)	
18	690.225	690.725	0.500
19	691.984	692.584	0.600
20	695.240	695.800	0.560
21	698.450	700.050	1.600
22	700.830	701.330	0.500
23	702.140	702.640	0.500
24	705.180	705.680	0.500
25	707.553	708.153	0.600
26	709.600	710.200	0.600
27	711.740	712.200	0.460
28	713.800	714.200	0.400
29	717.600	718.400	0.800
30	719.324	719.924	0.600
31	720.335	720.735	0.400
32	722.030	722.600	0.570
33	724.432	725.000	0.568

Note: Location and length of Retaining Wall provided above is as per TCS Schedule is tentative and minimum requirement. The actual length of Retaining Wall shall be determined by the Concessionaire in accordance with the Manual requirements with approval from the Independent Engineer/Authority. Any increase in the length specified in this Clause 4.12(b) of Annex-I of Schedule-B shall not constitute a Change of Scope, save and except any variations in the length arising out of a Change of Scope expressly undertaken in accordance with the provisions of Article 16.

4.13 Slope Protection

The side slope shall be protected by using suitable slope protection measures wherever required along the project road.

4.14 Drainage

Drainage system including surface and subsurface drains for the Project Highway shall be provided as per Section 6 of the Manual.

RCC Drain shall conform to the cross-sectional features and other details specified as per Clause 4.1 of Annex-I of Schedule-B. All drains shall suitably discharge in outfall.

Unlined drain shall be provided as per site conditions and design requirements.

4.15 Median Opening

Median openings other than the existing shall be constructed at appropriate locations at every 2 km as per site requirement in consultation with Independent Engineer/Authority as per Schedule D. The tentative location of median opening is given below:

S. No.	Existing Chainage (km)
1	659.500
2	663.200
3	667.200
4	673.500
5	685.400
6	687.400
7	689.000
8	691.150
9	696.000

S. No.	Existing Chainage (km)
10	701.300
11	703.500
12	706.500
13	709.500
14	715.300
15	721.500
16	723.500
17	725.000

Note: All chainages mentioned above are tentative and actual location of median openings shall be in accordance to schedule D in consultation with Independent Engineer /Authority. The same shall not constitute a Change of Scope, save and except any variations arising out of a Change of Scope expressly undertaken in accordance with the provisions of Article 16

4.16 Longitudinal Section

The longitudinal section / profile of the project highway shall be designed as per the provisions of Schedule-D, Clause 4.2 of Annex-I of Schedule-B and Clause 4.3 of Annex-I of Schedule-B.

4.17 Road Boundary Wall

Road boundary wall shall be provided along the entire length on either side (including transverse requirements at structure locations) as per Clause 12.2 of the Manual.

4.18 Utility Shifting

Shifting of obstructing existing utilities indicated in Schedule A to an appropriate location in accordance with the standards and specifications of concerned Utility Owning Department is part of the scope of work of the Contractor. The bidders may visit the site and assess the quantum of shifting of utilities for the projects before submission of their

bid. Copy of utility relocation plan is enclosed. The specifications of concerned Utility Owning Department shall be applicable and followed.

Details of Utilities to be relocated:

(i) Electrical Utilities to be relocated

Notes.

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

-
- (a) The type/ spacing/ size/ specifications of poles/ towers/ lines/ cables to be used in shifting work shall be as per the guidelines of utility owning department and it is to be agreed solely between the Contractor and the utility owning department. No change of scope shall be admissible and no cost shall be paid for using different type/ spacing/ size/ specifications in shifted work in comparison to those in the existing work or for making any overhead crossings to underground as per requirement of utility owning department and/or construction of project highway. The Contractor shall carry out joint inspection with utility owning department and get the estimates from the utility owning department. The assistance of the Authority is limited to giving forwarding letter on the proposal of Contractor to utility owning department whenever asked by the Contractor. The decision/ approval of utility owning department shall be binding on the Contractor.
- (b) The supervision charges at the rates/ charges applicable of the utility owning department shall be paid directly by the Authority to the Utility Owing department as and when Contractor furnishes demand of Utility Owing Department along with a copy of estimated cost given by the later.
- (c) The dismantled material/scrap of existing Utility to be shifted/ dismantled shall belong to the Contractor who would be free to dispose-off the dismantled material as deemed fit by them unless the Contractor is required to deposit the dismantled material to utility owning department as per the norm and practice and in that case the amount of credit for dismantled material may be availed by the Contractor as per estimate agreed between them.
- (d) The utilities shall be handed over after shifting work is completed to Utility Owing Department to their entire satisfaction. The maintenance liability shall rest with the Utility Owing Department after handing over process is complete as far as utility shifting works are concerned.

Appendix B-I

CROSS SECTIONS SCHEDULE

S. No.	Chainage (km)		Length (km)	Type of C/S Applicable	Proposed Pavement Type		Ref. as per 6 lane manual IRC SP 87-2019	Remarks
	From	To			Left Hand Side (LHS)	Right Hand Side (RHS)		
1	658.000	659.200	1.200	1	Flexible	Rigid	Fig. 2.7, Type A-6	Typical cross section for six lane divided highway with service road and raised median in open country
2	659.200	659.900	0.700	1	Flexible	Rigid	Fig. 2.7, Type A-6	Typical cross section for six lane divided highway with service road and raised median in open country
3	659.900	660.200	0.300	4	Flexible	Rigid	Approach & Service road widening	Typical cross section for six lane divided highway with Approaches to existing underpasses
4	660.200	660.900	0.700	7	Flexible	Flexible	Fig 7.8 with Service road widening	Typical cross section for six lane divided highway near approaches to structures
5	660.900	661.525	0.625	3	Flexible	Rigid	Fig. 2.9, Type B-2	Typical cross section for six lane divided highway with service road and raised median in built up section (retaining existing service road on LHS/RHS/ or BOTH Sides)
6	661.525	662.075	0.550	7	Flexible	Flexible	Fig 7.8 with Service road widening	Typical cross section for six lane divided highway near approaches to structures
7	662.075	663.000	0.925	3	Flexible	Rigid	Fig. 2.9, Type B-2	Typical cross section for six lane divided highway with service road and raised median in built up section (retaining existing service road on LHS/RHS/ or BOTH Sides)

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

Note:

1. Any variation in lengths specified in the above table shall not constitute a Change of Scope, save and except any variation in the length arising out of a change of scope expressly undertaken in accordance with the provisions of Article 16.
2. **At these locations the new VUP including approaches and Service Roads are under construction by NHAI as separate Contract. The same shall be part of this Concession Agreement. Although no improvements is envisaged at these locations, improvements, if any, based on the actual site conditions as per Manual / Specifications and Standards is within the scope of the Concessionaire. Actual chainage may differ based on site condition.
3. Metal beam crash barrier to be provided all along the project road on both sides of central median and on the outer edge of main carriageway as per the requirements.

Typical Cross Section

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

** EXISTING PARTIAL RETAINING WALL TO BE RAISED TO ACCOMMODATE THE PROPOSED CROSS SECTION. IN CASE PROPOSED CROSS SECTION AS MENTIONED IS NOT ACCOMMODATED, NEW RETAINING WALL TO BE CONSTRUCTED AS PER SITE CONDITION.

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

Six laning of Kagal-Satara section of NH-48 (old NH-4) [Package – II from km 658.000 to km 725.000] in the State of Maharashtra to be executed on BOT (Toll) mode under Bharatmala Pariyojana

Appendix B-II

DRAWINGS

Strip plan, Plan & Profile of Flood affected stretch and Drainage Plan of Flood affected stretch for the project road are enclosed

Appendix B-III**BYPASSES & REALIGNMENT/RAISING****1 Bypass & Realignment**

Nil

2 Raising**(A) Main Carriageway**

- a. From existing km 670.500 to km 670.750 – raising at this location along with provision of a balancing culvert on both sides
- b. From existing km 670.850 to km 671.025 – raising at this location along with provision of a balancing culvert on both sides
- c. From existing km 682.650 to km 683.100 –approaches to proposed Koyna River bridge
- d. From existing km 684.200 to km 684.250 – Raising of road
- e. From existing km 685.220 to km 686.600 – road section for both side main carriageway to be raised
- f. From existing km 718.500 to km 719.000 –approaches to proposed Urmodi River bridge

Note :

1. Plan & Profile for flood affected stretches are attached at Appendix B-II for reference purpose only. The chainage mentioned in Plan & Profile for flood affected stretches are Design chainages. Minimum FRL for the above stretches shall be followed based on the detailed HFL study.
2. Apart from the above-mentioned flood affected stretches, the following stretches of Service Road affected during the recent floods in 2019 and 2021 will require raising as per detailed HFL study/ flooding requirement during execution of widening from 4-lane to 6-lane.

(i) Service Road

- a. From Existing Chainage – km 662.700 to km 662.900 - road section for both side service road to be raised.
- b. From Existing Chainage – km 665.000 to km 665.050 - road section for both side service road to be raised.
- c. From Existing Chainage – km 667.500 to km 667.700 - road section for both side service road to be raised.

- d. From Existing Chainage – km 668.500 to km 668.700 - road section for both side service road to be raised.
- e. From Existing Chainage – km 670.000 to km 670.150 - road section for both side service road to be raised.
- f. From Existing Chainage – km 670.600 to km 670.650 - road section for left side service road to be raised.
- g. From Existing Chainage – km 674.600 to km 674.700 - road section for both side service road to be raised.
- h. From Existing Chainage – km 675.400 to km 675.600 - road section for both side service road to be raised.
- i. From Existing Chainage – km 677.950 to km 678.000 - road section for both side service road to be raised
- j. From Existing Chainage – km 679.700 to km 679.720 - road section for right side service road to be raised
- k. From Existing Chainage – km 683.500 to km 683.650 - road section for both side service road to be raised
- l. From Existing Chainage – km 684.200 to km 684.250 - road section for right side service road to be raised
- m. From Existing Chainage – km 685.600 to km 685.850 - road section for both side service road to be raised
- n. From Existing Chainage – km 686.200 to km 686.300 - road section for right side service road to be raised
- o. From Existing Chainage – km 693.400 to km 693.700 - road section for both side service road to be raised.
- p. From Existing Chainage – km 709.500 to km 709.700 - road section for left side service road to be raised.

79	720.400	720.600	0.200
80	722.200	722.600	0.400
81	724.200	724.600	0.400
82	724.600	724.800	0.200
83	724.800	725.000	0.200

Note:

1. Re-grade/ reconstruction of existing service roads shall be required in the locations of proposed minor bridges, Box/slab culverts and flood affected stretches.
2. Due to retrofitting of six lane on the existing four lane, the Service Road, if required to be shifted outwards on normal embankment, the widening/reconstruction of the Service Road and adjoining drain shall be carried out in consultation with Independent Engineer/Authority. The same shall not constitute any Change of Scope.
3. The Acceleration lane, deceleration lane and transition lane shall be constructed in addition to length given in above table and will be considered as incidental to the project and shall not be counted towards service road/ slip road length.
4. Provision shall be made for proper entry and exit ramps between the main highway and the service roads/slip roads through properly designed acceleration and deceleration length at suitable locations in consultation with Independent Engineer/Authority. The same shall not constitute any Change of Scope.
5. **At these locations the new VUP including approaches and Service Roads are under construction by NHAI as separate Contract. The same shall be part of this Concession Agreement. Although no improvements is envisaged at these locations, improvements, if any, based on the actual site conditions as per Manual / Specifications and Standards is within the scope of the Concessionaire. Actual chainage may differ based on site condition.

B) PROPOSED SERVICE ROAD**i) PROPOSED SERVICE ROAD ON LHS**

S. No	Existing Chainage (km)		Length (km)	Side
	From	To		
1	658.000	659.200	1.200	Left

22	720.600	722.200	1.600	Right
23	722.600	724.200	1.600	Right

Note-

1. The proposed location of service roads is tentative and the same shall be finalized in consultation with Independent Engineer/Authority. Any change in location shall not be treated as change in scope of work.
2. The Acceleration lane, deceleration lane and transition lane shall be constructed in addition to length given in above table and will be considered as incidental to the project and shall not be counted towards service road/ slip road length.
3. Provision shall be made for proper entry and exit ramps between the main highway and the service roads/slip roads through properly designed acceleration and deceleration length at suitable locations in consultation with Independent Engineer/Authority. The same shall not constitute any Change of Scope.
4. **At these locations the new VUP including approaches and Service Roads are under construction by NHA as separate Contract. The same shall be part of this Concession Agreement. Although no improvements is envisaged at these locations, improvements, if any, based on the actual site conditions as per Manual / Specifications and Standards is within the scope of the Concessionaire. Actual chainage may differ based on site condition.

C) PROPOSED SLIP ROAD**i) PROPOSED SLIP ROAD ON LHS**

S. No	Existing Chainage (km)		Length (km)	Side
	From	To		
1	678.830	682.300	3.470	Left

ii) PROPOSED SLIP ROAD ON RHS

S. No	Existing Chainage (km)		Length (km)	Side
	From	To		
1	678.830	682.300	3.470	Right

Note-

1. The proposed location of slip roads is tentative and the same shall be finalized in consultation with Independent Engineer/Authority. Any change in location shall not be treated as change in scope of work.
2. The Acceleration lane, deceleration lane and transition lane shall be constructed in addition to length given in above table and will be considered as incidental to the project and shall not be counted towards service road/ slip road length.
3. Provision shall be made for proper entry and exit ramps between the main highway and the service roads/slip roads through properly designed acceleration and deceleration length at suitable locations in consultation with Independent Engineer/Authority. The same shall not constitute any Change of Scope.

Appendix B-V**AT GRADE MAJOR INTERSECTIONS**

At Grade Major Intersections (On cross road locations underneath the flyovers/underpasses & on service road) to be improved are given below:

S. No.	Chainage (km)	Side	Type	Leading To
1	671.560	Both	X- junction	Left -Wathar MDR 56, Right -Rethare MDR 60
2	676.320	Both	X- junction	Pachwad Phata (SH-80)
3	697.800**	Both	Cross -Junction	Left - Bhawani Wadi, Right -Pandharpur
4	718.000	LHS	T- Junction	Patan

- Note:**
- 1) All chainages mentioned above are tentative and actual location of junctions shall be as per the site condition and direction of Independent Engineer/Authority.
 - 2) Not to be limited to the above specified locations and it shall be finalized in consultation with Independent Engineer/Authority
 - 3) **At these locations the new VUP including approaches and Service Roads are under construction by NHAI as separate Contract. The same shall be part of this Concession Agreement. Although no improvements is envisaged at these locations, improvements, if any, based on the actual site conditions as per Manual / Specifications and Standards is within the scope of the Concessionaire. Actual chainage may differ based on site condition.

Appendix B-VI**AT GRADE MINOR INTERSECTIONS**

At Grade Minor Intersections (On cross road locations underneath the flyovers/underpasses & on service road) to be improved are given below:

S. No.	Existing Chainage (km)	Side	Type	Leading To
1	660.500	BOTH	X- junction	R-Nerale
2	663.450	LHS	T- junction	Desai Mala
3	664.350	Both	X- junction	L-Shene , R-Yevalewadi Village
4	665.775	BOTH	X- junction	L-Kasegaon, R-Kasegaon
5	668.260	LHS	T- junction	Kasegaon
6	669.350	BOTH	X- junction	L-Belewada, R-Malkhed
7	670.800	LHS	T- junction	Belewada Malkhed
8	672.160	BOTH	X- junction	L-Kale, R-Field
9	673.070	LHS	T- junction	Wathar
10	674.400	BOTH	X- junction	L-Narayanawadi, R-Atke
11	677.625	LHS	T- junction	Nandlapur
12	678.900	LHS	T- junction	Dakhinwadi
13	684.700	LHS	Y- junction	Munde
14	686.775	RHS	T- junction	village
15	688.100	LHS	T- junction	village
16	688.750	RHS	Y- junction	village
17	692.275	BOTH	X- junction	L-Belewadi, R-Talbid
18	695.500	BOTH	X- junction	L-Warade Village, R-Warade Village
19	698.900	LHS	Y- junction	village
20	701.075	BOTH	X- junction	village
21	705.425	BOTH	X- junction	Village
22	706.175	LHS	T- junction	village
23	706.825	LHS	T- junction	village
24	707.850	BOTH	X- junction	L-Pali, R-Kashil
25	708.100	RHS	Y- junction	colony
26	708.150	RHS	Y- junction	colony
27	708.525	RHS	Y- junction	colony
28	709.850	BOTH	X- junction	colony
29	711.900	BOTH	X- junction	L-Mohan Hotel
30	713.400	BOTH	X- junction	L-Village, R-Atit Bus Stand
31	719.630	BOTH	X- junction	L-Borgaon Phata, R-Apsinghe
32	720.475	BOTH	X- junction	L-Borgaon Phata, R-Chuhni Pateshwer Nagar

S. No.	Existing Chainage (km)	Side	Type	Leading To
33	722.275	BOTH	X- junction	L-Bharat Gaon, R-Bharatwadi
34	724.700	LHS	Y- junction	Valase

- Note:** 1) All chainages mentioned above are tentative and actual location of junctions shall be as per the site condition and direction of Independent Engineer/Authority.
2) Not to be limited to the above specified locations and it shall be finalized in consultation with Independent Engineer/Authority

Appendix B-VII**A. Details of Proposed Grade Separated Structure (Flyovers)**

S. No.	Existing Chainage (km)	Location	Proposed Structural Configuration	Proposed Span Arrangement (m)	Vertical Clearance (m)	Total width (m)	Remarks
1	678.830 to 682.300	Malkapur	2 x 3-lane	8x30+1x25+ 9x30+1x25+ 13x30+1x25+ 11x30+1x35+ 3x30+1x25+ 38x30+1x35+ 28x30	5.5	29.5	Main Carriageway

Note-

- 1) The proposed location of Grade Separated Structures (Flyovers) are tentative and the same shall be finalized in consultation with Independent Engineer/Authority. Any change in location shall not be treated as change in scope of work.
- 2) The above locations, Grade separated intersections junction shall be improved as per IRC manual and in consultation with Independent Engineer/Authority. Grade separated Intersections shall be developed as per Schedule D.

B. Details of Dismantling and Demolishing of Flyover including road approaches with lead, lift and disposals

S. No.	Chainage (km)	Side	Span Arrangement (m)	Overall length (m)	Width(m)	Type of Structure
1	680.615	Left	1 x 20.0	20.00	12.0	PSC Girders
2	680.615	Right	1 x 20.0	20.00	12.0	PSC Girders
3	680.742	Left	2 x 20.0	40.00	12.0	PSC Girders
4	680.742	Right	2 x 20.0	40.00	12.0	PSC Girders
5	682.159	Right	18 x 20.0	360.00	12.0	PSC Girders

Appendix B -VIII**A. Details of Proposed Vehicular Underpasses**

S. No.	Chainage (km)	Location	Proposed Clear Span (m)	Vertical clearance (m)	Total width (m)	Proposed Structural configuration	Type of super-structure	Type of sub-structure
1	660.500	Nerale	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
2	664.350	Yevalewadi	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
3	672.170	Wathar	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
4	693.500	Near Taswade Toll Plaza	1 x 25	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
5	697.800**	Pandharpur Junction	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
6	704.200**	Indoli Phata	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
7	711.000	Jamgaon	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
8	713.300	Jamgaon/Atit Bus Stop	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type
9	718.000	Nagathane/Borgaon	1 x 20	5.5	2x15.1	6-lane divided Carriageway	T-beam girder	RCC pier type

- Note-**
- 1) Pedestrian and cattle crossing of size 6m X 3.5m with necessary flooring shall be provided on both side of RE wall approaches for pedestrian and cattle movement. The appropriate location shall be decided in consultation with IE.
 - 2) The proposed location of Underpasses are tentative and the same shall be finalized in consultation with Independent Engineer/Authority. Any change in location shall not be treated as change in scope of work.
 - 3) The above locations, Grade separated intersections junction shall be improved as per IRC manual and in consultation with Independent Engineer/Authority. Grade separated Intersections shall be developed as per Schedule D.
 - 4) All underpasses lateral clearance shall include 1.5m wide raised side walk with grills for use of pedestrians.
 - 5) **At these locations the new VUP including approaches and Service Roads are under construction by NHAI as separate Contract. The same shall be part of this Concession Agreement. Although no improvements is envisaged at these locations, improvements, if any, based on the actual site conditions as per Manual / Specifications and Standards is within the scope of the Concessionaire. Actual chainage may differ based on site condition.

B. Details of Dismantling and Demolishing of Vehicular underpass including road approaches with lead, lift and disposals

S. No.	Chainage (km)	Span Arrangement (m)	Width(m)	Type of Structure
1	680.280	1 x 8.0 x 4.5	24	RCC Box Structure

Appendix B-IX**A. Details of Proposed Light Vehicular Underpasses (LVUP)**

S. No.	Chainage (km)	Location	Proposed Clear Span (m)	Vertical clearance (m)	Total width (m)	Type of super-structure	Type of sub-structure
1	661.800	Kedarwadi	1x12	4.5	2x15.1	Box Type	RCC Wall
2	668.240	Kasegaon	1x12	4.5	2x15.1	Box Type	RCC Wall
3	678.100	Nandlapur	1x12	4.5	2x15.1	Box Type	RCC Wall
4	715.200	Majgaon Phata	1x12	4.5	2x15.1	Box Type	RCC Wall

Note-

- 1) The proposed location of Underpasses are tentative and the same shall be finalized in consultation with Independent Engineer/Authority. Any change in location shall not be treated as change in scope of work.
- 2) The above locations, Grade separated intersections junction shall be improved as per IRC manual and in consultation with Independent Engineer/Authority. Grade separated Intersections shall be developed as per Schedule D.

B. Details of Pedestrian Underpasses (PUP) to be Reconstructed as Light Vehicular Underpasses (LVUP)

S. No.	Chainage (km)	Location	Proposed Structural configuration	Proposed Size (m)	Height (m)	Total width (m)	Remark
NIL							

C. Details of Dismantling and Demolishing of Pedestrian underpass including road approaches with lead, lift and disposals

S. No.	Chainage (km)	Span Arrangement (m)	Width(m)	Type of Structure
1	678.950	1 x 6.0 x 3.5	24.5	RCC Box Structure
2	680.600	1 x 6.0 x 2.75	24.5	RCC Box Structure
3	680.980	1 x 6.0 x 3.5	24.1	RCC Box Structure
4	681.500	1 x 8.0 x 3.5	12	RCC Box Structure
5	681.725			Existing FOB

Appendix B-X**A. Details of Major Bridges Proposed New on Main Carriageway**

S. No.	Existing Chainage (km)	Location	Proposal	Proposed Structural configuration	Span arrangement (No. x length) (in m)	Length (m)	Total width (m)
1	682.741	Koyna River	Additional 3-lane proposed on LHS main carriageway	Additional 3-lane	7 x 30.5	213.5	17
2	718.650	Urmodi River	Additional 3-lane proposed on LHS main carriageway	Additional 3-lane	26.8+26.9+26.65+26.8	107.15	17

Note- 1) The Location and the proposed span arrangement is tentative and the same shall be finalized in consultation with Independent Engineer. Any change in span arrangement shall not be treated as change in scope of work.

B. Details of Major Bridges Proposed New on Service Road

S. No.	Existing Chainage (km)	Location	Proposal	Proposed Structural configuration	Span arrangement (No. x length) (in m)	Length (m)	Total width (m)
1	682.741	Koyna River	Additional 2-lane proposed on RHS Service Road	Additional 2-lane	7 x 30.5	213.5	11

Note- 1) The Location and the proposed span arrangement is tentative and the same shall be finalized in consultation with Independent Engineer. Any change in span arrangement shall not be treated as change in scope of work.

Appendix B-XI**A. Details of Proposed Minor Bridges on Service Road**

S. No.	Existing Chainage (km)	Side	Location	Proposal	Span arrangement (No. x length) (in m)	Length (m)	Total width (m)	Remarks
1	658.750	Left	Peth Naka	2 lane	1 x 12	12	11	New

24	714.170	Right	Majgaon	2 lane	1 x 14.0	14	11	New

- Note-**
- 1) Approaches to both sides of the proposed minor bridges on service road to be raised as per the site requirement.
 - 2) In case of minor bridges for widening/repair, the same shall be reconstructed if the design shows that these are unsafe for design loads. In addition, structural audits needs to be done to assess the condition / suitability of the Structure. No change of scope shall be considered in such cases.
 - 3) The Location and the proposed span arrangement is tentative and the same shall be finalized in consultation with Independent Engineer. Any change in span arrangement shall not be treated as change in scope of work.

B. Details of Dismantling and Demolishing of Minor Bridge on Service Road including road approaches with lead, lift and disposals.

S. No.	Existing Chainage (km)	Span Arrangement (m)	Total width (m)	Remarks
1	671.100	3 x 17.5	12	Dismantling

C. Details of Minor bridges proposed for New/ Reconstruction (On Main Carriageway)

S. No.	Existing Chainage (km)	Location	Proposal	Proposed Structural configuration	Span arrangement (No. x length) (in m)	Length (m)	Total width (m)	Remarks
1	662.708	Kedarwadi	6-lane proposed	RCC Box Structure	4 x 10	40	2x15.1	Re-construction due to hydrology

S. No.	Existing Chainage (km)	Location	Proposal	Proposed Structural configuration	Span arrangement (No. x length) (in m)	Length (m)	Total width (m)	Remarks
2	664.965	Yevlewadi	3-lane proposed on LHS	RCC Box Structure	1 x 8	8	17	Stone masonry Arch slab extension. Proposed for Reconstruction
3	693.453	Taswade	6-lane proposed	RCC Box Structure	3 x 5.1	15.3	2x15.1	New
4	698.258	Umbraj	6-lane proposed	RCC T Girder	3 x 15	45	2x15.1	Reconstruction
5	699.950	Umbraj (Tarali river)	3-lane proposed on LHS	PSC I Girder	4 x 14	56	15.1	Reconstruction
6	713.598	Local Drain	6-lane proposed	RCC I girder	1 x 14.6	14.6	2x15.1	Reconstruction due to proposed VUP Approach filling
7	714.170	Majgaon	3-lane proposed on LHS	RCC I girder	1 x 14	14	15.1	New

- Note-**
- 1) Approaches to both sides of the proposed minor bridges to be raised as per the site requirement.
 - 2) In case of minor bridges for widening/repair, the same shall be reconstructed if the design shows that these are unsafe for design loads. In addition, structural audits needs to be done to assess the condition / suitability of the Structure. No change of scope shall be considered in such cases.
 - 3) The Location and the proposed span arrangement is tentative and the same shall be finalized in consultation with Independent Engineer. Any change in span arrangement shall not be treated as change in scope of work.

D. Details of Dismantling and Demolishing of Minor Bridge on Main Carriageway including road approaches with lead, lift and disposals.

S. No.	Existing Chainage (km)	Location	Span Arrangement (m)	Total width (m)	Remarks
1	662.708	Left	2 x 7.85	11.8	Dismantling
2	662.708	Right	2 x 7.85	11.8	Dismantling
3	664.965	Left	2 x 3.9	12.0	Dismantling
4	693.453	Left	3 x 5.1	12	Dismantling
5	693.453	Right	3 x 5.1	12	Dismantling
6	698.258	Left	1x16.117 + 1x14.18 + 1x14.18	12.0	Dismantling
7	698.258	Right	1x16.1 + 1x14.18 + 1x14.18	12.0	Dismantling
8	699.950	Left	4 x 14.0	8.4	Dismantling

57	724.193	Box	1x3.5

- Note-**
- 1) All chainages mentioned above are tentative and actual location of culverts shall be as per direction of Independent Engineer/Authority. Any increase or decrease of culvert width or culvert numbers as per site requirement shall not be treated as change of scope.
 - 2) In case of culverts for widening, the same shall be reconstructed if the design shows that these are unsafe for design loads. In addition, structural audits need to be done to assess the condition / suitability of the Structure. No change of scope shall be considered in such cases.
 - 3) The overall width of the above culverts shall be equal to Main Carriageway width and service road width including median/separator gaps as per TCS Schedule given in Appendix B-I including the width of existing culverts. In other words, the above culverts shall also be provided in median gap and also between main carriageway and service road/slip road, in case there is any service road/slip road.

B. Details of Box /Slab / Arch culvert to be reconstructed as Box culvert

S. No.	Existing Chainage (km)	Size of Opening (m)

- Note-**
- 1) All chainages mentioned above are tentative and actual location of culverts shall be as per direction of Independent Engineer/Authority. Any increase or decrease of culvert width or culvert numbers as per site requirement shall not be treated as change of scope.
 - 2) In case of culverts for widening, the same shall be reconstructed if the design shows

that these are unsafe for design loads. In addition, structural audits need to be done to assess the condition / suitability of the Structure. No change of scope shall be considered in such cases.

3) The overall width of the above culverts shall be equal to Main Carriageway width and service road width including median/separator gaps as per TCS Schedule given in Appendix B-I including the width of existing culverts. In other words, the above culverts shall also be provided in median gap and also between main carriageway and service road/slip road, in case there is any service road/slip road.

4) **At these locations the new VUP including approaches, Service Roads and other structures are under construction by NHA as separate Contract. The same shall be part of this Concession Agreement. Although no improvements is envisaged at these locations, improvements, if any, based on the actual site conditions as per Manual / Specifications and Standards is within the scope of the Concessionaire. Actual chainage may differ based on site condition.

D. Details of Pipe Culverts to be reconstructed

S. No.	Chainage (km)	Number of pipes	Diameter of pipe (m)
1	683.100	1	1.2
2	717.430	1	1.2
3	719.350	1	1.2

- Note-**
- 1) All chainages mentioned above are tentative and actual location of culverts shall be as per direction of Independent Engineer/Authority. Any increase or decrease of culvert width or culvert numbers as per site requirement shall not be treated as change of scope.
 - 2) In case of culverts for widening, the same shall be reconstructed if the design shows that these are unsafe for design loads. In addition, structural audits need to be done to assess the condition / suitability of the Structure. No change of scope shall be considered in such cases.
 - 3) The overall width of the above culverts shall be equal to Main Carriageway width and service road width including median/separator gaps as per TCS Schedule given in Appendix B-I including the width of existing culverts. In other words, the above culverts shall also be provided in median gap and also between main carriageway and service road/slip road, in case there is any service road/slip road.

Appendix B-XIII**REHABILITATION OF EXISTING STRUCTURES****1. Minor Repairs of Existing Flyovers**

S. No.	Chainage (km)	Location	Span Arrangement (m)	Total Length (m)	Super-Structure	Substructure
1	683.580	Left	2 x 20.0	40	PSC Girders	RCC Circular Pier
2	683.580	Right	2 x 20.0	40	PSC Girders	RCC Circular Pier

Note-

- 1) All above-mentioned existing bridges and structures are proposed to be retained after carrying out necessary repairs and rehabilitation works.
- 2) Repairs shall include but not limited to general cleaning of structures and area around structures, restoration of slopes and protective works, removal and relaying of existing wearing coat, repair and replacement of drainage spouts, construction of new RCC Crash Barriers in place of old existing railing, providing of new expansion joints and bearings in place of old ones wherever required and repair and rehabilitation of damaged concrete of any etc. to the complete satisfaction of Independent Engineer/Authority.
- 3) Repair mentioned in 'Note' are only indicative and all major/ minor repairs to structures shall be carried out as per Standard, Manual and in accordance with Good Industry Practice. No extra cost for any structure for any repair shall be entertained

2. Vehicular Underpasses proposed for minor repair

S. No.	Chainage (km)	Span Arrangement (m)	Structure Type
1	665.764	1 x 8.0 x 4.5	RCC Box Structure
2	669.500	1 x 8.0 x 4.5	RCC Box Structure
3	671.560	1 x 10.5 x 4.5	RCC Box Structure
4	676.320	1 x 10.5 x 4.5	RCC Box Structure
5	686.762	1 x 10.5 x 4.5	RCC Box Structure
6	692.290	1 x 10.5 x 4.5	RCC Box Structure
7	698.800	1 x 10.5 x 4.5	RCC Box Structure
8	699.400	1 x 10.5 x 4.5	RCC Box Structure
9	707.848	1 x 8.0 x 4.5	RCC Box Structure
10	711.901	1 x 8.0 x 4.0	RCC Box Structure
11	719.625	1 x 10.5 x 4.5	RCC Box Structure

Note-

- 1) All above-mentioned existing bridges and structures are proposed to be retained after carrying out necessary repairs and rehabilitation works.
- 2) Repairs shall include but not limited to general cleaning of structures and area around structures, restoration of slopes and protective works, removal and relaying of existing wearing coat, repair and replacement of drainage spouts, construction of new RCC Crash Barriers in place of old existing railing, providing of new expansion joints and

bearings in place of old ones wherever required and repair and rehabilitation of damaged concrete of any etc. to the complete satisfaction of Independent Engineer/Authority.

3) Repair mentioned in 'Note' are only indicative and all major/ minor repairs to structures shall be carried out as per Standard, Manual and in accordance with Good Industry Practice. No extra cost for any structure for any repair shall be entertained

3. Pedestrian Underpasses proposed for minor repair

S. No.	Chainage (km)	Span Arrangement (m)	Structure Type
1	660.120	1 x 6.0 x 3.5	RCC Box Structure
2	665.900	1 x 3.7 x 2.7	RCC Box Structure
3	670.805	1 x 6.0 x 3.5	RCC Box Structure
4	673.100	1 x 6.0 x 3.5	RCC Box Structure
5	674.400	1 x 3.0 x 2.75	RCC Box Structure
6	677.640	1 x 6.0 x 3.5	RCC Box Structure
7	684.715	1 x 6.0 x 3.5	RCC Box Structure
8	685.140	1 x 3.0 x 2.75	RCC Box Structure
9	688.113	1 x 6.0 x 3.5	RCC Box Structure
10	689.575	1 x 8.0 x 4.5	RCC Box Structure
11	690.475	1 x 6.0 x 3.5	RCC Box Structure
12	695.488	1 x 6.0 x 3.5	RCC Box Structure

Note-

1) All above-mentioned existing bridges and structures are proposed to be retained after carrying out necessary repairs and rehabilitation works.

2) Repairs shall include but not limited to general cleaning of bridges and area around bridges, restoration of slopes and protective works, removal and relaying of existing wearing coat, repair and replacement of drainage spouts, construction of new RCC Crash Barriers in place of old existing railing, providing of new expansion joints and bearings in place of old ones wherever required and repair and rehabilitation of damaged concrete of any etc. to the complete satisfaction of Independent Engineer/Authority.

3) Repair mentioned in 'Note' are only indicative and all major/ minor repairs to structures shall be carried out as per Standard, Manual and in accordance with Good Industry Practice. No extra cost for any structure for any repair shall be entertained

SCHEDULE – C

SCHEDULE – C
(See Clause 2.1)**PROJECT FACILITIES****1. Project Facilities**

The Concessionaire shall construct the Project Facilities in accordance with the provisions of this Agreement. Such Project Facilities shall include:

- (a) Toll Plazas;
- (b) Roadside Furniture;
- (c) Highway lighting;
- (d) Pedestrian Facilities;
- (e) Landscaping and Tree Plantation;
- (f) Truck Lay-Bys;
- (g) Bus-Bays and Bus Shelters;
- (h) ;Advance Traffic Management System (ATMS);
- (i) Utilities;
- (j) Rainwater harvesting.
- (k) Others;
 - a. Highway Patrol Unit(s);
 - b. Emergency Medical Services
 - c. Crane Services;
 - d. Communication System

2. Project Facilities for Six-Laning

Project Facilities forming part of six-Laning and to be completed on or before the Project Completion Date have been described in Annexure -1 of this Schedule-C.

ANNEXURE – 1
(Schedule - C)

Project Facilities for Six – Laning

1 Project Facilities

The Concessionaire shall construct the Project Facilities described in this Annexure - I to form part of the Six- Lane project Highway. The Project Facilities shall include:

- (a) Toll Plazas;
- (b) Roadside Furniture;
- (c) Highway lighting;
- (d) Pedestrian Facilities;
- (e) Landscaping and Tree Plantation;
- (f) Truck Lay-Bys;
- (g) Bus-Bays and Bus Shelters;
- (h) Advance Traffic Management System (ATMS);
- (i) Utilities;

2 Description of Project Facilities

Each of the Project Facilities is briefly described below:

2.1 Toll Plazas

The existing toll plaza, including the toll booths as well as administrative building shall be dismantled and reconstructed as a staggered toll plaza (Refer Strip Plan at Appendix B-II of Schedule-B) as per the requirements of Schedule D as per details below:

Chainage (km)	Minimum no. of Toll Lanes	Location
694.400	24 (12 + 12) lanes staggered	Taswade Toll Plaza

- (i) The existing Administrative Building at Taswade Toll Plaza shall be dismantled and reconstructed as per the requirements of Schedule D.

- (ii) The existing toll booths at Taswade Toll Plaza shall be dismantled and reconstructed as staggered toll booths with 12 toll lanes for each direction of travel as per the requirements of Schedule D.
- (iii) All Toll Lanes to be equipped with ETC equipment.
- (iv) Separate toilet facilities shall be provided near toll plaza location as per MoRTH Circular F. No. RW/NH-33044/05/2018/S&R (P&B) dated 18th January 2018.
- (v) Weigh in Motion (WIM) devices shall be provided in toll lanes at Toll Plaza location.
- (vi) Point of Sale (POS) with card swapping machines shall be provided.
- (vii) Static weighbridge shall be provided at Toll Plaza.

2.2 Road Side Furniture

The provision of road side furniture shall be finalised as per schedule D and in consultation with the Independent Engineer/Authority.

- (i) Traffic Signs and Pavement Markings

Traffic signs and pavement markings shall include roadside signs, overhead signs; kerb mounted signs and road markings along the project highway. The design and marking for the Project Highway shall be as per the design standard indicated in Schedule-D and the location for various treatments shall be finalised in consultation with the Independent Engineer/Authority.

All signs and markings shall be of retro-reflective type
- (ii) The cat's eyes or road studs shall be provided to improve the visibility in night-time and wet-weather conditions as per Clause 9.5 of IRC:SP:87-2019.
- (iii) W-beam metal crash barriers with delineating reflectors fitted on them shall be provided on all embankments with height 3 m or more
- (iv) In low embankments and flat curves, where crash barriers are not provided, these need to be delineated by 1.5 m high reflectorized delineators
- (v) W-beam metal crash barriers shall be provided in continuation of the parapet/concrete crash barrier on both side of raised central median and on the outer edges of carriageway subjected to a minimum length of 184.687km, in addition to hazard marker signs in all approaches to and exit from in bridges and other CD structures locations
- (vi) All curves with R (radius) less than 750m are to be delineated on outer side of the curve from both the directions (for RH curve it will be on shoulder and for LH curve it will be on median), by chevron signs.
- (vii) One-way reflective road studs shall be provided on edge lines and lane lines on the approach to an intersection or a high level bridge/culvert/ROB etc. with high embankment Also, such studs shall be provided along tie sharp curves.
- (viii) Traffic Safety Devices, as required

- (ix) Boundary Stones
- (x) Hectometre / Kilometer Stones
- (xi) Traffic Blinker Signals (LED) at intersections

2.3 Highway Lighting

Highway Lighting (LED) shall be provided at the following locations:

2.3.1 Street Lighting

Street Lighting shall be provided at the locations of toll plaza, interchanges/slip roads and on structures such as major bridges, ROB's, Flyovers and Underpasses including high mast at toll plaza/Major junctions, interchange/slip roads locations. Lighting facilities shall be provided both above and beneath at the locations of Interchanges, flyovers, VUPs, LVUPs & PUPs.

In addition, Street lighting shall be provided at urban stretches as defined in Clause 1.1 of Annex-I of Schedule-B.

2.4 Pedestrian Facilities

Pedestrian guard-rail shall be provided on the approaches at the inner edge of the footpath at Bus-bay locations.

Guidelines for the provision of pedestrian facilities on roads with special reference to the Person with Disabilities shall be followed in accordance with MORTH Circular F.No. RW/NH-340661212018-S&R(B)(P&B) dated 25th June 2019 and as per IRC:103-2012 - Guidelines for Pedestrian Facilities.

2.5 Landscaping and Tree Plantation

Tree plantation and landscaping shall be confirming to as per IRC SP 21 provisions.

Landscaping of the highway shall be done on, but not limited to, the following:

- Median
- At Grade intersection locations
- Toll Plaza Area
- At other prominent locations to enhance aesthetics, if required anywhere.

2.6 Proposed Truck Lay-byes locations

The locations are given below:

S. No.	Chainage (Km)	Location	Truck Lay Byes Side
1	675.250	Narayanwadi	Both sides
2	710.925	Khodad	Both sides

2.7 Bus bays and Bus Shelters

New Bus bays and bus shelters shall be provided at locations where passengers are expected to take or get down from buses. For safety separate Bus bays shall be provided at such locations on both sides and proper safety and crossing arrangements provided.

Covered steps along with a ramp for use of disabled persons with railing on either side shall be provided for climbing up/down from Bus Shelter to underpass/overpass to carriageway and vice versa as per Schedule-D.

The locations are given in –**Appendix C-I**.

Exact location will be decided in consultation with Independent Engineer/Authority.

2.8 Advance Traffic Management System (ATMS)

Advance Traffic Management System (ATMS) shall be provided for the entire length of the Project, at the following minimum locations as specified below in accordance with the Manual of Specifications and Standards and as referred in Schedule-D.

S. No.	Type of ATMS	Location	Remarks
1	Mobile Communication System	At such locations so as to cover entire length with mobile communications.	from km 658.000 to km 725.000
2	Variable Message Signs	As per Schedule D	
3	Meteorological Data System	One location (near toll Plaza)	
4	Automatic Traffic Counter and Vehicle Classification	At Toll Plaza	
5	Video Surveillance System	At each side of all Flyover on both direction.	
6	Video Incident Detection System	At every Operation and Maintenance centers.	

Note: In addition to above locations, additional locations shall be identified and provided in accordance to schedule D in consultation with Independent Engineer/Authority. The same shall not constitute a Change of Scope, save and except any variations in the length arising out of a Change of Scope expressly undertaken in accordance with the provisions of Article 16.

2.9 Utilities

Provision for accommodating utilities shall be made over as well as underground within utility corridor on either side of the project highway.

2.10 Rainwater Harvesting

Minimum 02 (Two) Nos. of Rainwater harvesting units per km length of the project stretch shall be provided as part of the scope of the project. Locations shall be finalized by the Independent Engineer, in consultation with the Authority.

a) The locations and design of stretch (i.e.) diameter/length of recharge shaft etc. shall be based on the rain fall intensity and geo-technical strata. The guidelines and norms issued by the Central Ground Board may also be adopted while finalizing the location and design of rainwater harvesting units.

b) Rainwater Harvesting and Artificial recharging shall be provided on all the buildings and structures such as Toll Plaza building, Grade separated structures etc. which are to be developed as a part of project corridor.

2.11 Others;**2.12.1 Highway Patrol Unit(s)**

Highway Patrol Unit shall be provided as specified in Clause 12.10 of IRC:SP:87-2019

2.12.2 Emergency Medical Services

Emergency Medical Services shall be provided as specified in Clause 12.11 of IRC:SP:87-2019

2.12.3 Crane Services

Crane Services shall be provided as specified in Clause 12.12 of IRC:SP:87-2019

2.12.4 Communication System

Communication System shall be provided as specified in Clause 12.13 of IRC:SP:87-2019

Appendix C-I**Locations of Bus Bays and Bus Shelters:**

S. No.	Chainage (km)	
	LHS	RHS
1	660.650	660.650
2	661.650	661.650
3	664.250	664.250
4	668.400	668.400
5	678.200	678.200
6		683.400
7	683.475	
8	697.700	697.700
9	704.050	704.050
10	711.250	711.250
11	713.700	713.700
12	718.150	718.150
13	722.350	722.350
TOTAL (nos.)	12	12
	24	

Note- The location indicated in this table is tentative and subjected to be changed/relocated as per the site requirement in consultation with Independent Engineer/Authority.

SCHEDULE - D

SCHEDULE – D

(See Clause 2.1)

SPECIFICATIONS AND STANDARDS

The Concessionaire shall comply with the Specifications and Standards set forth in Annex-I of this Schedule-D for construction of the Six-Lane Project Highway.

ANNEXURE – 1
(Schedule-D)

Specifications and Standards for Six-Laning

1 Manual of Specifications and Standards to apply

Subject to the provisions of Paragraph 2 of this Annexure -I, Six – Laning of the Project Highway shall conform to the Manual of Specifications and Standards for six laning (IRC:SP:87-2019).

2 Deviation from the Manual

Notwithstanding anything to the contrary contained in the aforesaid Manual, the following Specifications and Standards shall apply to the Six-Lane Project Highway, and for purposes of this Agreement, the aforesaid Manual shall be deemed to be amended to the extent set forth below:

S. No.	Item	Provision as per Manual	Modified Provision
1	Median width	Table no. 2.2 of clause 2.5 of the Manual (IRC:SP:87-2019)	Width of existing median is retained in all stretches of road.
2	Minimum width of paved portion of Service Road	2.12.2.1	As per Appendix B-I of Annex-I of Schedule-B
3	Major Bridge over Service Road	Clause 2.12.2.2	As per Appendix B-X of Annex-I of Schedule-B
4	Grade separators/ Flyovers, Vehicular underpasses, Pedestrian underpasses, Major bridges and Minor bridges and approaches to existing Grade separators/ Flyovers, Vehicular underpasses, Pedestrian underpasses	Clause no. 7.3, Clause no. 7.18 and Clause no.7.19 of the Manual (IRC:SP:87-2019)	Existing structures widths are retained without any modifications
5	Cross- sectional features		As per Appendix B-I of Annex-I of Schedule-B
6	RE Wall construction for Grade Separated Structures	Provision of (Geo Grid Steel) Strips is adopted for Reinforced Earth Wall construction.	CI-3103.1- MORTH specifications
7	Overall width of structures Bridges/ Flyovers/ VUP/ LVUP/ PUP	Clause 7.3	Width of structures for Bridges/flyovers/VUP/ LVUP/ PUP as per Schedule B shall be followed.
8	Tunnels	Clause 10.4.5 – Underground Tunnel at toll plaza	Deleted
